EXPERIENCE

MedSurvey, Southampton, PA— Senior Survey Programmer

October 2008 - Present

- Create online surveys in the medical field using a combination of Python, Javascript, and CSS within the online platform Forsta Surveys (formerly Decipher)
- Create responsive CSS templates for varying survey question types
- Problem solve when client visions do not adequately line up with capabilities of platform, especially when concerning mobile compatibility
- Build out new question types among many other customizations
- Deliver tested surveys within tight timeframes of 5 days or less while managing multiple projects at once
- Manage workload between myself and our junior programmer, helping him solve problems and ensuring timely delivery

EDUCATION

Rochester Institute of Technology, Rochester, NY— BS in New Media Interactive Design

September 2003 - January 2008

PASSION PROJECTS

Poker-Manager — <https://poker-manager.herokuapp.com>

I play in an online home poker game with a group of friends and we needed a way to easily figure out who needs to pay who at the end of each game. This site started as a way to parse an exported CSV ledger file and eventually evolved to parse the play-by-play log allowing players to track their sessions showing wins/losses, bankroll, and many useful statistics about their playing tendencies.

SKILLS

- Problem solving
- Quick learner
- Time management
- Good communication
- Attention to detail
- Team player

PROFICIENCIES

- JavaScript / React / Angular / jQuery
- Python (Flask / Jinja)
- PHP (CakePHP)
- MySQL / PostgreSQL
- HTML5
- CSS / LESS / SASS
- Bootstrap
- Git / SVN
- Command line interfaces
